GitHub

User Authentication

Next.js

Mongo DB

Node.js

ABOUT

After discovering my love for coding at University as a hobby, I took the leap and enrolled in an intensive web development boot camp at BrainStation. There, I met like-minded individuals who shared my fascination for new technology, design, and innovation. Post boot camp I have been working in a small, agile team within the web-3 gaming space, exposing myself to creative problem-solving and cutting-edge web-3 solutions, further fueling my passion for web development.

EXPERIENCE

FEB 2023 - Present
canVERSE Games l London
Web-3 Developer

- Spearheaded the development of a cutting-edge web-3 gaming platform, catering to a community of crypto gaming enthusiasts.
- Collaborated closely with designers to conceptualise and create wireframes for intuitive user interfaces, ensuring a seamless and engaging user experience.
- Implemented custom decentralised authentication in collaboration with a back-end engineer, enhancing security and privacy for users.
- Designed and developed innovative technology from the ground up, enabling users to securely store blockchain assets within the system and seamlessly interact with them during gameplay.

APR 2022 - FEB 2023
canVERSE Games | London
Junior Web Developer

- Collaborated with contractors to enhance and modify a preexisting code base, successfully replacing a WordPress website with a bespoke Next.js solution, leveraging this transition to integrate web-3 tools and streamline custom processes, enhancing the platform's capabilities and user experience.
- Provided regular and direct updates to the CEO and STO on accessibility improvements, demonstrating a commitment to inclusivity and user-centric design.

JAN 2022 - Present
BrainStation l London
Industry Mentor (Part Time)

- Provided valuable insight and support to aspiring web developers seeking to enter the industry, acting as a mentor and guide in their career journey.
- Demonstrated dedication to fostering a collaborative learning environment by actively engaging with professionals at BrainStation events, exchanging ideas and best practices within the web development community
